

Shyam Bhagat

shyam.bhagat.26@dartmouth.edu — [linkedin.com/in/shyambhagat](https://www.linkedin.com/in/shyambhagat) — +1 603-667-5567 — US Permanent Resident

Objective

Tech-driven sales professional with strong technical skills and a background in business development, revenue generation, and data-backed decision-making. Combining a foundation in technical analytics with sales pipeline development, I am eager to drive revenue growth in SaaS and B2B technology markets.

Education

Dartmouth College, *Graduating June 2026*

Double Major: Computer Science & Data Science, GPA: 3.62/4.00

Relevant Coursework: Business Strategy, Sales Analytics, Market Research, Data Visualization, Cloud Computing

Sales & Business Development Experience

University of West Attica

Jun 2024 - Jul 2024

Software Engineering Intern — Sales Enablement

- Designed sales enablement materials that increased adoption of a new Linux driver by 40% among researchers.
- Led 5+ product onboarding sessions, ensuring stakeholders could seamlessly integrate the solution.
- Converted technical insights into business growth strategies, supporting increased product adoption.

CleanEdge Wastewater Management

Jun 2022 - Aug 2022

Data Engineer — Business Intelligence

- Built a real-time sales analytics dashboard, helping leadership identify \$200K in cost-saving opportunities.
- Automated reporting for 250+ key metrics, cutting manual workload by 80% for 10 employees.
- Enabled data-driven pipeline growth strategies, supporting revenue optimization efforts.

Sales-Driven Technical Projects

Singapore Solar

Jan 2022 - Jul 2022

Business Development & Data Science Consultant

- Secured \$50,000 in funding through 100+ cold calls, data-backed investor pitches, and strategic stakeholder outreach.
- Developed a mobile app with 500+ downloads, increasing donor engagement and project visibility.
- Created data-driven sales presentations, leading to additional investments and donor retention.

CodePunk — Multiplayer Web Game

Oct 2024 - Present

- Received QA feedback from 20+ testers, refining product-market fit for future commercialization.
- Built an AI-driven matchmaking system, currently tested to support 100 concurrent users.
- Developed predictive engagement analytics, optimizing user retention strategies.

Amazon Review Predictor

Sep 2023 - Nov 2023

- Built a sentiment analysis model (84% accuracy on 10,000+ reviews), revealing key customer insights.
- Presented findings to department heads, showcasing data-driven product recommendation potential.
